> On site, met with Enterprise and conducted site walk, oil is bermed next to highway but line is still releasing oil. Vac trucks and frac tanks on-site recovering product. Enterprise is conducting the cleanup. We r checking two creeks and conducting air monitoring downwind in a small residential area. Currently, we have been advised no creeks have been impacted. Enterprise has CTEH conducting air monitoring. Advised CTEH that all workers need respirators in the work area due to high Benzene and VOC levels discovered during site walk next to the spill. HWY 121 is closed to traffic until the road is cleaned. We will be out here for a couple of days.
